Sr.Net Developer / UI/UX

Project: Pfizer POD, Ferring POD and Gilead POD

Client: Precision for value

Description: The Pull-through Portal developed by Precision for Medicine is an integrated and interactive web-based application that guides users through campaigns for a selected region and prescriber and uses the information to create marketing material based on user selections. Pfizer, Ferring and Gilead spend an amount of money every year marketing drugs trying to get doctors to prescribe their drugs and consumers to buy their drugs than they spend researching and developing new drugs. This marketing is being done manually using excel sheets and so much work/time/money is involved in it to get that done every month with the latest data and calculations.

Roles & Responsibilities:

- Interacting with Clients to get the proper requirements.
- Resolve technical and design issues and perform independent unit testing.
- Responsible for taking up client calls.
- Implemented Itext sharp, word to pdf using Adobe document generator.

Environment: C#, React, WebAPI Core, JavaScript, JQuery, Bootstrap, SQL Server 2008, Entity Framework, Linq, & Visual Studio 2017.

ASP.Net Developer

Project: AstraZeneca POD, Viiv POD and Janssen POD

Client: Precision for value

Description: The Pull-through Portal developed by Precision for Medicine is an integrated and interactive web-based application that guides users through campaigns for a selected region and prescriber and uses the information to create marketing material based on user selections. Pfizer, Ferring and Gilead spend an amount of money every year marketing drugs trying to get doctors to prescribe their drugs and consumers to buy their drugs than they spend researching and developing new drugs. This marketing is being done manually using excel sheets and so much work/time/money is involved in it to get that done every month with the latest data and calculations.

Roles & Responsibilities:

- Discussing projects flows and understand the business and functional requirement.
- Taking reference sites for analyzation.
- Created N-tier architecture for different modules.
- Responsible for taking up client calls.
- Responsible for implementing enhancements.
- Implemented Itext sharp, word to pdf using Adobe document generator.

Environment: C#, Asp.net Web Forms, SQL Server 2008, Entity Framework, Linq, JavaScript & Visual Studio 2017.

Developer

Project: Front Office Supervisory Portal

Client: Point72

Description: The Portal application is used to sign off the reports which are generated from the active batch job and windows application. This is a trading domain where data is dumped in the database from different means. The reports that are displayed on the portal can be signed off with or without escalation which completely depends on the client based on the data after his review.

Roles & Responsibilities:

- Responsible for coding in C#.NET.
- Responsible for taking up client calls.
- Responsible for implementing enhancements.

Environment: WPF, C# & Visual Studio 2017.

Asp.Net Developer

Project: EUPHOR

Client: xTensegrity

Description: EUPHOR chemical compliance management software is the product of a collaboration between our parent company, xTensegrity, and client companies which manufacture specialty chemicals.

EUPHOR was developed by Product Stewardship professionals for Product Stewardship peers after realizing too many Product Stewardship departments still rely on a mix of spreadsheets, emails and SharePoint to complete their substance registration and notification dossiers.

Roles & Responsibilities:

- Created responsive UI.
- Responsible for coding in ASP.NET, C#.NET, JQuery.
- Resolve technical and design issues and perform independent unit testing.

Environment: ASP.Net MVC, C#, Entity Framework, Linq, JavaScript & VS 2015.
